### 2. DIAGNOSIS

|                      |                                                                          |
|----------------------|--------------------------------------------------------------------------|
| Primary Diagnosis:   | Hypertensive Heart Disease with early-stage Left Ventricular Hypertrophy |
| Secondary Diagnosis: | Type 2 Diabetes Mellitus (poorly controlled)                             |
| ICD-10 Codes:        | I11.9   E11.9                                                            |

### 3. LABORATORY VALUES

| Test                  | Result           | Reference Range       | Status |
|-----------------------|------------------|-----------------------|--------|
| Fasting Blood Glucose | 186 mg/dL        | 70 - 100 mg/dL        | HIGH   |
| HbA1c                 | 8.4%             | < 5.7%                | HIGH   |
| Total Cholesterol     | 224 mg/dL        | < 200 mg/dL           | HIGH   |
| LDL Cholesterol       | 148 mg/dL        | < 100 mg/dL           | HIGH   |
| HDL Cholesterol       | 38 mg/dL         | > 40 mg/dL            | LOW    |
| Triglycerides         | 210 mg/dL        | < 150 mg/dL           | HIGH   |
| Serum Creatinine      | 1.1 mg/dL        | 0.7 - 1.2 mg/dL       | NORMAL |
| eGFR                  | 72 mL/min/1.73m2 | > 60                  | NORMAL |
| Hemoglobin            | 13.2 g/dL        | 13.5 - 17.5 g/dL      | LOW    |
| WBC Count             | 7,400 /uL        | 4,500 - 11,000 /uL    | NORMAL |
| Platelet Count        | 210,000 /uL      | 150,000 - 400,000 /uL | NORMAL |
| Sodium (Na+)          | 138 mEq/L        | 136 - 145 mEq/L       | NORMAL |
| Potassium (K+)        | 4.1 mEq/L        | 3.5 - 5.0 mEq/L       | NORMAL |

### 4. PRESCRIBED MEDICATIONS

| Medication | Dose | Frequency | Duration |
|------------|------|-----------|----------|
|------------|------|-----------|----------|

|                        |        |                          |         |
|------------------------|--------|--------------------------|---------|
| Amlodipine (Norvasc)   | 5 mg   | Once daily (morning)     | 90 days |
| Metformin HCl          | 500 mg | Twice daily (with meals) | 90 days |
| Atorvastatin (Lipitor) | 20 mg  | Once daily (night)       | 90 days |
| Aspirin (Ecosprin)     | 75 mg  | Once daily (morning)     | 90 days |
| Furosemide (Lasix)     | 40 mg  | Once daily (morning)     | 30 days |

### 5. DOCTOR'S NOTES & RECOMMENDATIONS

- Patient's blood pressure was recorded at 158/96 mmHg during visit. Immediate lifestyle modification advised.
- Strict diabetic diet to be followed. Carbohydrate intake to be limited to less than 45g per meal.
- Daily 30-minute moderate exercise (walking) recommended. Avoid strenuous activity until cardiac review.
- Echocardiogram and stress test scheduled for 20 May 2026 at Cardiology Dept.
- Follow-up appointment in 4 weeks. Patient to monitor blood glucose twice daily and maintain log.
- Advised to reduce sodium intake to less than 2g/day and avoid alcohol and smoking.
